

IMPEROVO FOODS

THE IMPEROVO FOODS EGG PROCESSING PLANT

The Imperovo Foods egg processing plant is one of the most technologically advanced facilities for processing eggs in Europe, which has been operating in the Ukrainian dry egg product market since 2007. Imperovo Foods is part of AVANGARDCO IPL, the largest vertically integrated producer of shell eggs and dry egg products in Ukraine and Europe.

SOME OF IMPEROVO FOODS' MAJOR STRENGTHS INCLUDE:

- **Leading position:** Leader in the Ukrainian market with a 66% share of the production of dry egg products.
- **Use of modern technology:** State-of-the art equipment for egg transportation, breaking, fermentation, pasteurisation and drying processes by SANOVO, a leading company within egg handling and processing equipment.
- **Enhanced production capacities:** The processing capacity has grown to 6 million eggs per day. In the future, we expect to increase the plant's processing capacity to 10 million eggs per day.
- **Own raw material base:** We use our own poultry farm eggs to produce the egg powder. This ensures both full traceability and the excellent quality of our products. We operate 19 poultry farms across Ukraine and their produce can meet the plant's needs in shell eggs for processing in full.

- **High quality and safe products:**
Throughout the whole production process, the egg mass remains in a closed system of pipes and tanks in order to avoid any contamination. As a result of the automated processes, our products are completely sterile. By employing innovative approaches, we are able to preserve the egg's calorie content and nutritional value, keeping the natural benefits of our products to a maximum.
- **Strict adherence to food safety protocols:**
We implement integrated quality control systems at our Imperovo Foods egg processing plant, in compliance with the best international standards, as well as apply a wide range of additional biosecurity measures and carefully manage our flocks' dietary and sanitary standards to ensure top quality produce. Currently, Imperovo Foods maintains an integrated quality and safety management systems that have been certified to ISO 22000:2005, ISO 9001:2015, FSSC 22000. Our egg products comply with the Halal requirements as well as certified for export to the European Union.

OUR CUSTOMERS

Thanks to its commitment to high food safety standards, the Imperovo Foods' egg products are renowned worldwide for their quality and reliability, and are therefore the preferred choice to many domestic and international food manufacturers.

EXPORT DESTINATIONS

■ 2009-2018 EXPORT MARKETS

- Imperovo Foods is the largest exporter of dry egg products from Ukraine.
- Main export markets are the EU, Asia, the Far East, MENA and the CIS.
- Export portfolio of over 25 countries.

EGG WHITE POWDER, HIGH GEL

APPLICATION & FUNCTIONALITY

Suitable for the confectionery, bakery and meat industry, for production of crab sticks. The advantages of this product include premium gelling and water binding properties. A further advantage is the storage conditions, handling and shelf life of powder compared to liquid products.

PRODUCT DESCRIPTION

Consists of 100% natural de-sugared, spray dried and pasteurised egg white. 100 g of powder dissolved in 700 g of water corresponds to 800 g of fresh egg white (equivalent to approx. 25 eggs). It is recommended to wait before the solution absorbs all the water.

INGREDIENTS

Egg white powder.

STORAGE AND SHELF LIFE

Storage: Keep in a dry, dark and well ventilated area.

Shelf life:

At 2 °C and the relative humidity up to 75%: 24 months in an unopened package.

At 20 °C and the relative humidity up to 75%: 12 months in an unopened package.

PACKAGING

Blue polybag in a carton box, 20 kg net.

EGG YOLK POWDER

APPLICATON & FUNCTIONALITY

Suitable for mayonnaise, dressings, pasta, ice cream, baked products, cake mix or other products where egg yolk is needed. The advantages of this product include its emulsifying qualities, taste, colour and texture. A further advantage is the storage conditions, handling and shelf life of powder compared to liquid products.

PRODUCT DESCRIPTION

Consists of 100% natural pasteurised and spray dried liquid egg yolk. 100 g of powder dissolved in 125 g of water corresponds to approx. 225 g of liquid egg yolk.

INGREDIENTS

Egg yolk powder. Depending on the client's preferences, we can also add salt or sugar as additives to our egg products.

STORAGE AND SHELF LIFE

Storage: Keep in a dry, dark and well ventilated area.

Shelf life:

At 2 °C and the relative humidity up to 75%: 24 months in an unopened package.

At 20 °C and the relative humidity up to 75%: 12 months in an unopened package.

HEAT-STABLE EGG YOLK POWDER

APPLICATION & FUNCTIONALITY

This type is used mainly in the production of mayonnaise, as it is characterised by thermostability as well as excellent emulsifying properties. Provides stable emulsion in high temperature conditions, long-term storage. A further advantage is the storage conditions, handling and shelf life of powder compared to liquid products.

PRODUCT DESCRIPTION

Consists of 100% natural pasteurised and spray dried liquid egg yolk. 100 g of powder dissolved in 125 g of water corresponds to approx. 225 g of liquid egg yolk.

INGREDIENTS

Egg yolk powder. Depending on the client's preferences, we can also add salt or sugar as additives to our egg products.

STORAGE AND SHELF LIFE

Storage: Keep in a dry, dark and well ventilated area.

Shelf life:

WHOLE EGG POWDER

APPLICATION & FUNCTIONALITY

Suitable for baked products, ready meals, meat products etc. The advantages of this product include its texture and emulsifying properties. A further advantage is the storage conditions, handling and shelf life of powder compared to liquid products.

PRODUCT DESCRIPTION

Consists of 100% whole egg powder. Pasteurised and spray dried liquid whole egg mass. 100 g dissolved in 300 g of water corresponds to 400 g fresh whole egg (equivalent to approx. 8 shell-eggs).

INGREDIENTS

Whole egg powder. Depending on the client's preferences, we can also add salt or sugar as additives to our egg products.

STORAGE AND SHELF LIFE

Storage: Keep in a dry, dark and well ventilated area.

Shelf life:

At 2 °C and the relative humidity up to 75%: 24 months in an unopened package.

At 20 °C and the relative humidity up to 75%: 12 months in an unopened package.

FROZEN LIQUID WHOLE EGG

APPLICATION & FUNCTIONALITY

Suitable for confectionery and baked products, ready meals, dressings etc. The advantage of this product is its homogeneous texture. The product is free from shell fragments and cross-contamination.

PRODUCT DESCRIPTION

Pasteurised frozen liquid whole egg. 1 kilogram of frozen liquid whole egg corresponds to 20-24 fresh eggs.

INGREDIENTS

Table shell egg.

STORAGE AND SHELF LIFE

Storage: Keep in a clean and well ventilated area.

Shelf life:

At a temperature not over - 18°C: 15 months

At a temperature not over - 12°C: 10 months

At a temperature not over - 6°C: 6 months
